

I am an avid traveler of this great country's highways and back roads. XM has become my choice for listening to radio during my travels. This service is a choice that I and other subscribers make because of the choices that XM Radio provides us. One of the major foundations of this great country is the freedom to choose what we want, whether it is provided as a free broadcast or a pay service is MY choice as an American citizen. This is just another attempt of corporate America try to squash the future because it threatens their bottom line.
